

MAIN 2026

We connect brands with people.
Our products create identity.

WE ARE DAIBER

Excellent appearances and a collective image are one thing. Creating a sense of belonging, a WE, is the other. We claim to be more than just a company in the field of corporate fashion.

We connect brands with people.

We are a manufacturer, consultant and long-term partner for our customers, suppliers and employees. We maintain fair dealings with each other and beyond. This can be felt in timeless designs which everyone can wear, which can cope with all situations and which create connections between brands and people. **Our products create identity.**

Our origin and Swabian roots keep driving our inventive spirit and enable us to continue developing in a future-oriented way. Our aim is to combine our knowledge and actions as a corporate-fashion platform.

The joint management of Daiber is in the hands of Kai Gminder, in the fourth generation of the family, and Christof Kunze.

TIMELESS DESIGNS, INDIVIDUALISATION AND COUNSELLING

Our own brand Daiber stocks more than 800 timelessly designed products in up to 160 colour variations and up to 16 sizes for the sectors promotion, sport, leisure, business, workwear and headwear – suitable for every company.

This diversified product range, combined with many years of expertise and numerous services, makes us one of the leading corporate fashion platforms in Europe. Our development of cuts and colours is fashionable and sustainable and we have a good price-performance ratio.

Thus we always offer the suitable textile solution for the challenges of our customers.

From comprehensive advice and customised textile decoration to tailor-made corporate fashion concepts, we are your full-service provider at eye level.

DECORATION OFFER

We are a full service partner for individual decoration. Our long-term experience and fully integrated production ensures that your transfers or your embroidery correspond to the state of the art in the promotional items market.

More elaborate decoration processes such as badges, weaving, patches, raised pile printing, embossed fasteners, all-over prints and much more are available from our Hong Kong location, Daiber Far East.

And, of course, you can also receive your goods blank or have transfers printed by us and iron them on yourself.

Advantages

- In-house embroidery
- Catering for many different target groups and requirements
- Combination strength and expert knowledge in individualisation

Our decoration techniques

DTF-Transfers

- Available from 10 pieces
- Detailed designs in bright colours
- Elegant matt surface
- Long durability
- High opacity on different textile types and colours
- Complex colour gradients possible, also photorealistic motifs
- Transparent carrier film for easy positioning when printing
- Stretchy and soft to the touch
- Washable up to 60 °C

3D-Embroidery

3D embroidery offers a particularly high level of expressiveness, intense colours and a multi-dimensional, three-dimensional look. Thanks to these properties, an advertising message created using 3D embroidery is even more memorable for the viewer.

Whether logos, lettering or number sequences, coats of arms or other motifs – 3D embroidery gives them depth. It makes them tactilely interesting, visually memorable and draws the eye, especially when the colours are vibrant.

As easy to care for as a traditional embroidery technique.

- Available from 15 pieces
- **For caps only!**

Flat-Embroidery

For centuries flat embroidery has been a high-quality process for decorating textiles. Due to continuous development of production techniques, there is a product available today which meets the highest demands in many application areas. Thus flat embroidery offers almost infinite possibilities of presenting a logo to perfection.

General conditions:

- Minimum order quantity: 15 pcs.
- Up to 12 colours
- Delivery time: around 2-3 weeks
- For textiles and caps

FULL-SERVICE-PLATFORM

3 steps to a perfect decoration

1 Advice from our experts

Whether for large quantities or small individual runs, whether embroidery or transfer - our team will be happy to advise you in order to find the best solution for you.

Hotline: +49 7432 7016-0
info@daiber.de

2 Transfer or embroidery?

In our in-house transfer printing department we produce all the standard transfers: DTF-transfers, D3000-transfers, photo-transfers, sublistop-transfers and soft-transfers. In our embroidery department we offer 3D-embroidery, flat embroidery, embroidery labels and embroidery labels with appliqué adhesive.

3 Ironing or embroidery department

In the ironing department, we apply the desired transfer to your textiles using an ironing press- in the embroidery department we embroider your caps or clothing.

RESPONSIBILITY

Corporate fashion with a clear conscience

Social Compliance

Gustav Daiber GmbH is a long-standing member of the Business Social Compliance Initiative (amfori BSCI) and commits itself as well as its business partners and suppliers to socially responsible business practices. Accordingly, the corporate fashion products of Daiber are manufactured in compliance with the BSCI Code of Conduct.

This code includes, among other things, a clear commitment to the right of employees to freedom of association, protection against discrimination and appropriate remuneration, i.e. a living wage. This ensures humane and respectful treatment of suppliers along the value chain.

Furthermore, the UN Guiding Principles on Business and Human Rights apply, as well as the occupational safety regulations of the International Labour Organisation (ILO). Child labour, forced labour or precarious working conditions are not tolerated. Several independent inspection bodies in the production countries take care of the strict auditing of all factories and ensure compliance with these conditions.

Environmental protection

In addition to social standards, Daiber is also committed to improving environmental sustainability in its international supply chain. By introducing the amfori BEPI system of the Business Environmental Performance Initiative, for example, environmentally oriented services can be monitored and potential for improvement can be identified. This makes it possible to work together with long-standing suppliers to develop new approaches for more product responsibility and a more responsible value chain and to implement them in a targeted manner. For this purpose, the production sites receive special training measures for practical implementation, so that the impact on the environment is continuously reduced.

All our products meet the highest quality standards and legal requirements for absence of harmful substances. Many items are OEKO-TEX® Standard 100 certified. We also increasingly use sustainable materials such as organic cotton and recycled polyester, which are certified according to OCS (Organic Content Standard), GRS (Global Recycled Standard) and RCS (Recycled Claim Standard) – for high-quality and environmentally conscious products.

100% of our suppliers are BSCI-audited.

15+ years of partnership with our suppliers.

OEKO-TEX® STANDARD 100

This standard guarantees that textile and non-textile product components pose no threat to health.

Compliance with REACH and POP regulations

The REACH Regulation (European Chemicals Regulation) governs the registration, evaluation, authorisation and restriction of chemical substances in the EU, while the POP Regulation restricts the use of persistent organic pollutants. All Daiber products are manufactured in compliance with REACH and POP regulations.

Quality Standard

The products are continually examined by certified testing institutes in the countries of production regarding the given parameters. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes, the quality is continually controlled.

SUSTAINABILITY

Organic Cotton and Recycled Polyester

For us, corporate responsibility also includes fair treatment of our environment, for example through innovative, durable collections made of organic cotton and recycled polyester.

We are convinced that it is only with courage that we can grow together and move towards the future - as we have been doing for more than 100 years.

Recycled Polyester - PET bottles are recycled to create a new Fashion

Collected plastic bottles are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production. Thus for producing the workwear cap MB6234 about 3 half-litre bottles are recycled and for the new sport T-shirt JN519 even 25.

Contains 5-49%
RCS recycled
polyester Certified
by Ecocert 302043

Organic Cotton Collection - Clothes with inner values

Fair, transparent, harmless: The Organic Cotton collection includes a wide range of sustainably produced organic cotton clothing for every fair fashion lover.

The Organic Cotton collection by Daiber impresses with a high quality combined with modern cuts and tasteful details. The naturalness is not only visible but also perceptible. Knowing that the components of the garment are made of sustainably grown cotton and that no genetically modified fibres are used conveys a completely new attitude towards life.

OCS Standard

In the production of Daiber textiles, the Organic Content Standard enables the exact proportion of organic material in a product to be recorded and tracked through the production chain. The superior 'Content Claim Standard' defines, among other things, the traceability of goods and transparency in the production chain for the OCS.

Contains 100%
Organically Grown
Cotton Certified OCS

CLIMATE NEUTRAL CATALOGUE

Certified Climate Protection

With every sheet of recycled paper we improve our ecological footprint

Recycled paper protects forests, biodiversity and the climate and saves energy, water and CO₂ during production. For producing this year's main catalogue, we are using 100% FSC certified recycled paper.

FSC Recycled

The FSC Recycled logo stands for products which contain only recycled paper.

The text in the logo reads:

'Product type made from recycled paper'.

Savings potential by using recycled paper

With each sheet of recycled paper, we improve our ecological footprint:

- Obtained from 100 % waste paper
- Saves 79 % water
- Saves 73 % energy
- Saves 42 % CO₂
- Certified by the FSC

Climate Protection through Afforestation in Germany

Our domestic forests are under enormous pressure: diseases, pest infestation, and increasingly extreme weather conditions are threatening their stability. Today, only around 20% of trees are considered healthy. Through targeted afforestation efforts, we actively strengthen the resilience of German forests to the impacts of climate change.

This project focuses on transforming monocultures into diverse, climate-resilient mixed forests. In collaboration with forestry experts, suitable tree species are selected and planted at various locations across Germany – including the Harz region, the Thuringian Forest, and the Vogelsberg. For every ton of CO₂ compensated, one tree is planted.

The tree planting initiative is part of a combined project and is currently linked to a certified solar energy project in Togo. This solar plant generates around 88,000 MWh of renewable electricity per year – enough to power nearly 160,000 households.

Double impact for climate and environment:

- CO₂ reduction through renewable energy
- CO₂ sequestration and biodiversity through forest restoration in Germany

FUNCTIONS & FEATURES

EASY CARE

This special finish makes shirts and blouses especially easy to iron. To preserve this function the textiles should not be overdried in the tumbler and you should avoid using an overheated iron.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

NON IRON

This special finish makes shirts and blouses iron-free: All you have to do is wash them, dry them and put them on. To preserve this function, these textiles should not be overdried in the tumbler and you should avoid using an overheated iron. If necessary, seams can be ironed at a low temperature.

BIONIC-FINISH®ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH®ECO protects man and nature.

BREATHABILITY / PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

CAPS FOR PRINTING

Caps with this label are ideal for printing and embroidering. The construction of the caps leaves a lot of space so the cap is easy to decorate, with the logo presented to perfection.

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

UPF 50+

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sun-screens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

TAPED SEAMS

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.

TOPCOOL®

TOPCOOL® polyester fibres perfectly absorb moisture due to their special surface and evacuate it quickly to the outside where it can evaporate.

CLIMACTIVE BODY PERFORMANCE

Intelligent climate regulation for maximum performance

Our innovative functional fabric helps your body to stay in the optimum temperature range at all times. The active particles in the fabric react to your body heat and moisture - they accelerate evaporation when you are too warm and slow down heat loss when you cool down.

The result: a constant microclimate directly on the skin that supports your performance, promotes regeneration and minimizes uncomfortable moisture.

COOLDRY®

Due to the CoolDry® finish moisture is transported to the outside and creates a comfortable feeling. The textiles dry quickly, are breathable and ideal for all activities.

LYCRA®

Lycra® allows the fabric both to stretch significantly and to retain its shape. Fabrics and garments containing Lycra offer exceptional fit, comfort, freedom of movement and good crease recovery values.

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

THINSULATE™ INSULATION

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

COOLMAX®

Through the channels of the breathable COOLMAX®-fibre humidity is evacuated extremely fast to the outer layers of the fabric. Thus the body is kept dry. At the same time a natural body temperature regulation is supported.

SORONA®AURA

sorona®AURA fibres consist of 37% vegetable components, obtained from renewable raw materials. Garments with sorona® Aura offer an eco-friendly alternative with outstanding breathability, lightweight comfort and efficient heat retention. sorona®AURA offers the perfect mix of sustainability and performance.

SUGENRO® GRS INSULATION

Sugenro® GRS Insulation is an innovative premium insulation product made from 100% recycled PET-bottles. Modelled on down, Sugeno® GRS Insulation is a soft, high-quality filling with a low weight and outstanding properties in terms of thermal behaviour, durability and breathability. The GRS certification confirms compliance with the highest ecological and social standards. Sugeno® GRS Insulation helps to reduce waste and greenhouse gas emissions, conserve natural resources and promote a circular economy.

UPF 50+

Coming to grips with the sun thanks to workwear with certified UV-protection

The more UPF, the better

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sunscreens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

98% Shielding of UV-radiation

CORRECTLY ASSESSING THE RISK

Skin cancer risk for people working outdoors

Many people work outdoors all day or part of the day. They have a much higher risk of contracting skin cancer than people working indoors. The same goes for leisure activities outdoors. The sun is your constant companion and supplies the vital vitamin D. But a lot of sun also means: headgear, sunscreen and UV-protective clothing.

UVA/UVB-rays

UV-radiation is especially strong in the months of April to September; from 11 a.m. to 4 p.m.

The dangers of UV-radiation

UV-radiation also exists when the sun is not shining.

Also penetrates the clouds.

Exists independent of outdoor temperature.

Penetrates loose tissue.

Is reflected by surfaces such as metal, water, concrete.

UV-clothing provides better protection than sunscreen

The best protection against harmful UV-radiation is provided by certified UV-protective clothing. It shields off radiation, does not have to be applied once again like sunscreen and therefore lasts all day. For the parts of the body uncovered by clothes sunscreen with a high sun protection factor and a headgear should be used.

Australian/New Zealand Standard AS/NZS 4399:2017

The best-known and worldwide most common standard is the Australian-New Zealand standard. For checking the UV-protective factor according to AS/NZS 4399:2017, the UV-protection is established on a new and dry textile. For this purpose, the solar spectrum of Melbourne, Australia, is reproduced. Clothing marked with the Australian/New Zealand standard provides protection against UVA- and UVB-radiation of sunlight. A product marked with UPF 50+ according to this standard blocks more than 98% of the harmful UV-rays. The textiles protect the parts of the body covered by them.

Tested textile UV-protection

The LABTECH Prüfungsgesellschaft mbH is officially accredited according to DIN EN ISO/IEC 17025 2005 and based on this standard. As an independent laboratory they test the UV-protective factor of our textiles.

High-quality clothes hanger with non-slip rubber coating • High-quality wooden hanger with James & Nicholson print • Flat form with shiny metal hook and non-slip ends • Suitable for ladies' and children's sizes

Material: 100% wood

one size

raw

SIZES, QUALITIES & CARE

Washing Tub

The numbers in the tub indicate the maximum washing temperatures which must not be exceeded. The bar below the tub requires a more (mechanical) gentle treatment (e.g. programme for delicate fabrics). It designates washing programmes which are suitable for easy-care and delicate garments. Textiles made of cotton or mixed fibres should be pulled into shape when still wet. We recommend that textiles with prints or embroideries should only be washed on the reverse at a maximum of 40 degrees in order not to impair the quality of the print or embroidery.

Maximum washing temperature 95 °C normal process

Maximum washing temperature 60 °C normal process

Maximum washing temperature 60 °C gentle process

Maximum washing temperature 40 °C normal process

Maximum washing temperature 40 °C gentle process

Maximum washing temperature 30 °C normal process

Maximum washing temperature 30 °C gentle process

Hand washing, maximum washing temperature 40 °C

Do not wash

Bleaching Triangle

This symbol shows the textile cleaner whether the garment may be bleached or not.

Do not bleach

Tumble drying Tumble-Drier

The dots indicate the drying-grades of the tumble-drier. Textiles with transfer prints must not be tumble-dried.

Can be dried in a tumble dryer at a normal temperature of 80 °C, normal process, do not bleach, do not dry clean

Can be dried in a tumble dryer, low temperature 60 °C, gentle process

Do not tumble dry

Ironing Iron

The dots indicate the temperature scale of the irons. Textiles with prints or embroideries should only be ironed on the reverse.

Ironing with a maximum temperature of 160 °C on the soleplate

Iron at a maximum temperature of 120 °C on the soleplate; ironing with steam may cause irreparable damage.

Do not iron

Dry Cleaning Cleaning Drum

The letters are intended for the textile cleaner. They indicate the possible solvents. The bar below the circle requires cleaning under limited mechanical strain, with a limited amount of moisture and at a medium temperature. Textiles with prints or embroideries should not be dry cleaned.

Professional dry cleaning with perchloroethylene, dibutyloxymethane and all solvents listed under symbol F, normal process

Professional dry cleaning with hydrocarbons (distillation temperature between 150 °C and 210 °C, flash point between 38 °C and 70 °C) and decamethylpentacyclosiloxane, normal process (distillation temperature between 150 °C and 210 °C, flash point between 38 °C and 70 °C)

Do not dry clean

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a guide for handwriting or typing. The paper itself is a clean, off-white color. There are no margins, text, or other markings present on the page.

Blank lined area for writing.

INDEX- STICKERS

Quickly find products

For quickly finding our products, the small adhesive labels are the ideal help.

Just stick the labels to the desired product pages or use them as a complete index.

Strip off the sticker, lightly pre-fold it and attach it to the desired position.

OUR CREDO

**We connect brands with people.
Our products create identity.**

We deliver. And we deliver more than just boxes on pallets. We bring brands to the point – and to the body. With corporate fashion that not only fits, but also makes an impression.

Whether workwear or casual, outdoor or sportswear: we dress identity. And ensure that it

arrives – on time, stylishly, reliably. Because who says it is just about the look? It is about our logistics too.

In short:

When it comes to corporate fashion, we don't do things by halves – we deliver.

WE DELIVER
